

## Children's COVID-19 symptoms

While children and adults experience similar symptoms of COVID-19, children's symptoms tend to be mild and cold-like. Most children recover within one to two weeks. Their symptoms can include:

- Fever
- Runny nose
- Cough
- Fatigue
- Muscle aches
- Vomiting
- Diarrhea

If your child has symptoms of COVID-19 and you think he or she might have COVID-19, call your child's health care provider. Keep your child at home and away from others as much as possible, except to get medical care. If possible, have your child use a separate bedroom and bathroom from family members. Follow recommendations from the CDC, the World Health Organization (WHO), and your government regarding quarantine and isolation measures as appropriate.
